

# AS/400 Services

As one of the largest IT install bases in the world, the iSeries AS/400 platform remains one of the most powerful and popular computer systems in use today. Yet, in spite of its relevance and worldwide penetration, many companies are having difficulty properly supporting this powerful computer platform due to workforce attrition and the migration towards other computer systems. The good news is that Stratagem offers a unique opportunity for companies facing difficulties like this to address their AS/400 platform support needs.

We help maximize your AS/400 investment through a variety of targeted AS/400 services. Our experienced team of professionals has extensive knowledge and a heritage around the AS/400 platform dating back to the introduction of the system itself. We have evolved our capabilities through a *world-class delivery model* that ensures your AS/400 platform continues to deliver optimum business value for years to come.

### AS/400 Services

An experienced team of AS/400 professionals serves as the foundation of our AS/400 Services. These individuals have spent their careers dealing exclusively with the iSeries AS/400 and its predecessors. They possess a broad range of business and technical knowledge to ensure the gaps between business and technology are properly bridged. By extending these capabilities to include the skills in a Global Delivery Center, we deliver *immediate value* through improved productivity, better quality, and help you attain a higher return on investment.

Stratagem offers these specific AS/400 services:

**Project Management & Oversight** - Each engagement includes project management and oversight to help manage tasks and control costs.

**Application Development and Customization** - AS/400 software development services covering every phase of the development lifecycle, including programming and database analysis and design.

**Maintenance and Support** - Software maintenance and support services for mission-critical business applications, including JD Edwards, Marcam, SAP, CA-PRMS, and more.

**System Testing** - A variety of testing services, including test strategy and planning, product security, regression, security, and more.

**Conversions and Migrations** - Quick and cost effective conversion/migration from your AS/400 applications from/to Windows, UNIX or Linux to sustain or modernize key business applications.

**Upgrades and Optimization** - Upgrade services designed to minimize impact to your business and optimization services to extend the lifecycle of legacy systems.

**System Analysis** - Evaluation, selection, and installation of AS/400 hardware and software. Also, includes the financial analysis of various rent, lease, and purchase options.
